PROJECTS

- **Personal Portfolio:** For my personal portfolio project, I designed and developed a dynamic and visually appealing website that serves as an online showcase of my skills and projects as a software engineering student [View here](#).
- **Netflix Clone:** I skillfully crafted the front-end of a Netflix website replica, delivering an immersive visual design and user experience mirroring the popular streaming platform. [View here](#).
- **Starbucks Clone:** I created a Starbucks clone web application, replicating the user experience and functionality of the popular coffeehouse chain, Starbucks. This project showcases my web development skills in delivering an authentic virtual coffee ordering experience. [View here](#).
